Lester Snow
Executive Director
CalFed Bay/Delta Program
1416 Ninth Street, Suite 1155
Sacramento, CA 95814

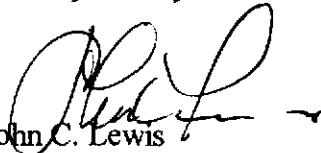

Dear Mr Snow,

As you prepare the Draft Programmatic Environmental Impact Report , please enter these comments into the formal record:

The CALFED Bay/Delta program should be revised to:

1. Increase investment in water conservation, groundwater management and drinking water treatment.
2. Prevent at source pollution to assure improved fresh and sea water quality.
Following heavy rains, we see an increase in bacteria in our stream and bay.
3. Assure adequate fresh water stream flows. Proposals to lower stream flow by withdrawing treated grey water for upstream irrigation affect endangered species and ground water supply.
4. Tax payers should not subsidize new or expanded dams.

Thank you for your consideration,

John C. Lewis
